WED ON THEIR VACATION.

Government Hospital Nurse and At-

tendant Marry at Rockville.

Friends of Miss Evelyn F. Jones, ar

ighteen-year-old nurse at the Govern-

ment Hospital for the Insane, and

Chancellor Nelson Sullivan, twenty-four years old, an attendant at the

same institution, are due for a sur-

that they were preparing to go on their

respective vacations.

But there was one little matter the telling of which they overlocked. That was that the vacations were to be spent jointly and that the vacationists would be man and wife.

Yesterday the pair went to Rock-ville, Md., where they took out a license and were married. Inquiry at the hospital brought forth only the information that both of the contracting parties had "gone on a vacation."

Fire Interrupts Traffic.

Traffic of the City and Suburba electric line was interrupted last night about 7 o'clock by a fire in the building of the Fuller Construction Company, Eckington place and O street northeast. The fire was of unknown origin. The damage was placed at

STRENGTHEN THE NERVES.

SHOWS HOW BAKING POWDER IS PRODUCED

Carefully Constructed Model of Plant Shown in Former Building of National Museum.

soda plant near Tully, N. Y., with brooks A friend of The Star telephoned a few of running water, wooded hills and a days ago that the people of Washing well built town is a unique exhibit in the old building of the National Museum, and shows in reduced form the method of producing that common but falfa, now in full bloom. household article—baking powder. It is a fact that ordinary baking powder are shows how salt is obtained from deep within the earth without mining, this product to be later used in obtaining soda. The model is unique in that it soda. The model is unique in that it is not only topographically correct with elevations and depressions carefully worked out as they exist in the region depicted in the model, but has the manufacturing plant, the salt wells, tanks, etc., and roads, houses and trees, together with brooks and lakes of real water. The salt wells lying at a depth of 1,200 feet below the sunface of the hills are shown, with the pipes which feed the tanks and reservoirs, below in the town of Solvay. Sections of Lake Onondaga and the Erie canal are also to be seen.

Brought In in Form of Pairs

Brought Up in Form of Brine. Bearing in mind the fact that salt is SEAMEN'S LAW CRIPPLES soluble in water, the engineers of the concern at Solvay evolved the scheme of using the abundant supply of pure water furnished by the numerous lakes in the region of Tully, N. Y., by forcing it into the deep lying salt beds and drawing it off in the form of salt water This was accomplished by sinking two pipes one within the other, sending the fresh water from the lakes down the larger pipe, and sucking up the salt water through the inner pipe. The sal water or brine is stored in concrete reservoirs, constructed near at hand, from where it is connected to the plant at Solvay, twenty-one miles away by a pipe line, and may be drawn off as

ummer Tours via Baltimore & Ohio R.R. VAST U. S. BEEF STORES TAKEN FROM COUNTRY

Imports Also Show Great Increase Since Abolishment of Duties.

More meat was taken from the nited States between August 1 last, when the war began and the present ime, than was taken during the enire three-year period ending June 30. 1914, according to figures produced by the Department of Commerce. Four imes as much left the country during he short period as during the three-Geological Survey Review Predicts year period referred to.

At the same time the imports neat and dairy products into the United States in the ten months preeding May 1 last were three times the value of those for a like period two ing industry of Alaska has begun a years ago and seven times those of the The present high entire fiscal year 1905. The great increase in this import

traffic first assumed large prop many copper properties on which in the fiscal year 1914, following the operations were suspended in mid-transfer of meats to the free list, it is summer last year. It is probable, says declared. However, the imports during declared. However, the imports during February, March and April show much smaller amounts than during the same months last year or even the earlies months of the current fiscal year.

The United States still exports far more meats than it imports, for although there have been record-breaking arrivals in the last two years, exports have been even larger. Returns for ten months indicate that the value of meat and dairy products exported this year will once more attain the \$200,000,000 level that marked the decade prior to 1909.

Fresh Beef Movements.

The outlook for an increased output for placer gold also is encouraging. There will be more dredges operated on Seward peninsula this year than last, and it also is probable that several new dredges may be in operation in other placer districts before the close of the season. In addition to the dredges there are a number of other placer mining plants of considerable size that will be operated this year for the first time. In fresh beef there is now a large movement, both into and out of the The large outward movement, however, is a development of ecent months. Over 25,000,000 pounds GUNS TO BE INSPECTED.

Two 12-Inch Rifles Aboard Battleship Wyoming Wear Out.

Two twelve-inch rifles on the battleship wyoming, which wore out, while
the other eight guns of the vessel's
main battery, under the same usage,
showed no signs of unusual wear, will
be brought to the naval gun factory
here to determine why they became
unserviceable. The rifles have been in
service on the Wyoming since 1912.

Officials said today that guns worn
out under such circumstances either

FOR JULY 4TH IS GIVEN

The health department of the Dis trict of Columbia has prepared a few simple and easily understood instructions for first-aid treatment of injuries sustained in Fourth of July accidents, such as explosions of cannon firecrackers, premature ignition of rockets and other forms of fireworks think every one might be interested in and the general run of accidents likely knowing that we have a full-blown al- to occur during celebrations of the closely related, and the museum exhibit falfa farm in our midst," said the once noisy but now generally safe and sane holiday.

Wound Must Be Opened.

and all foreign matter and injured tis-sue removed; the wound must be thoroughly cleaned and a disinfectant applied. This treatment must be followed promptly by the administration of tetanus antitoxin. No amount of cleaning will justify the omission of this precaution, as the antitoxin will not harm the patient and will prevent the development of the disease. After the symptoms have appeared it is useless to administer the antitoxin, for it will not cure.

port that Sewell Point spit light, in will loughby bay, opposite Old Point Comfort, was destroyed several days ago and a temporary light is being shown upor a stake until a new light can be established.

During one of the recent heavy cur-

impracticable to carry drinking water, remember that boiling renders water safe from typhoid.

Dangers on Potomac.

"Those who intend to enjoy the freeiom of the Fourth by spending the day canoeing upon the upper Potomac river should be mindful of how deep and rapid these waters are. Only a fool would rock the boat, but a slight unintentional shifting in the position of the occupant may be sufficient to upset a canoe or light rowboat. It requires a strong swimmer to save himself in the rapid waters of the upper Potomac; to save another as well requires exceptional strength and skill."
